THE WATER'S EDGE; A MEETING POINT FOR EARTH AND OCEAN.

Along the seashore, a milieu of colors and textures unite, differing surfaces become natural patterns we wish we could replicate into our own homes. Inspiration came while looking to the sea; The Coastal Glass Collection captures the essence and beauty of this paradise. Colors of rock, sand, mist, air, and driftwood, these intricate, interlocking tiles are available in two organic finishes that are soft to the touch. These tiles ebb and flow like rolling waves, Coastal will remain serene and soft throughout the tide of your life.
